

Product description

Pneumatically emptying system for Semco cartridges 360 ccm.
With a folding mechanism for replacing cartridges.

The cylinder is slowly driven down into the cartridge with hand lever valve.

The setting of the pressure regulator changes the pressure on the cartridge and thus the flow rate.

Connection options for dosing valves such as e.g. dispenser via a material tube.

Technical description

- Pneumatic cylinder with throttle valves
 - Pneumatic hand lever valve
 - Pressure regulator with manometer 0 - 6 bar
 - Folding unit for replacing cartridges
 - Dimension approx.: 970 x 180 x 135 mm (L / W / D)
-
- For media with low to medium viscosity, a PU tube 4 to 6 mm via G 1/4 connection is recommended
 - For highly viscous media, ask for the right tube size at axiss GmbH

Options:

7002-0004 Level sensor

5015 Ball-valve

5015-02 ball valve with quick release
