

4304-01 2k Gear pump 400 ml

0002 DiSoft Dosing Software

4480 Controller

4472 Foot switch

Beschreibung

Volume-accurate application of dosing media via 2K gear pump from 400 ml double cartridges.

Two separate gear pumps are driven by a single motor via a connecting shaft.
The mixing ratio is determined by the pump size.

The delivery rate can be adjusted. A preset quantity is dosed, then the gear pump switches off automatically. The pump can also be switched on and off via an external switch.
