

4027-3 1k Cartridge spindle 30-55-60 ml

(Exemplary Image)

4480 Controller

2400 Stand, small

4472 Foot switch

Description

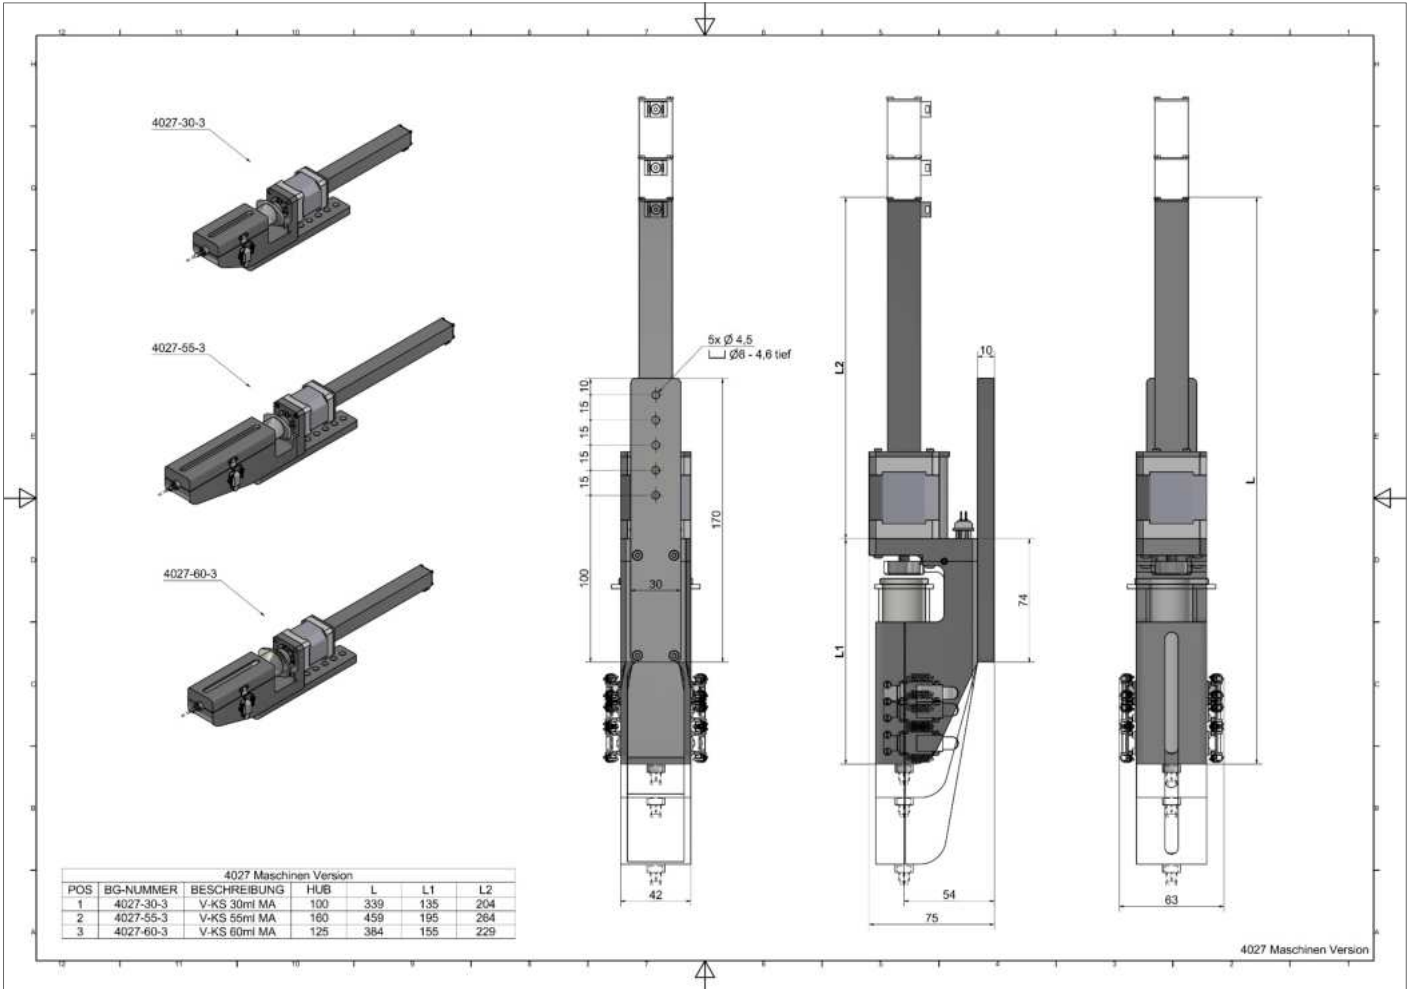

Mountable, electrically operated 1k dosing valve. The dosing material is dispensed directly from a material cartridge via a spindle and a stepper motor. Cartridge replacement via flip-up mechanism.

Homogeneous delivery of the dosing quantity over the entire length of the cartridge.

The control system can be used to enter the dosing quantity, speed, and other parameters.

4027-3 1k Cartridge spindle 30-55-60 ml

Dimensional drawing (Dimensions in mm)

Cartridge size	30/ 55/ 60 ml
Spindle motor pitch	6 x 1 mm
Dosing accuracy	+/- 0,05 ml (material depending)
Dosing volume min.	0,1 ml
Viscosity	Low viscous dosing media
Dimensions	See dimensioning sheet above
Weight	ca. 1,2 kg
